## Window Wash Systems for Cruise Vessels

**Efficient, Safe and Cost-Effective  
Window Cleaning Solutions**

**Excellence in  
Window Cleaning  
for Cruise Vessels**

In-house developed by Ned Marine Services.  
Engineered for performance. Certified for quality.

***“Keeping windows clean on cruise vessels is not just important — it is essential. Clean windows directly contribute to passenger satisfaction and the overall onboard experience.”***

### **In-House Developed for Cruise Operations**

Ned Marine Services has designed and produced a cost-effective window washing system, specifically developed for cruise vessels. Our in-house developed solution is engineered with practicality in mind and ensures optimal performance during short port stays.

### **Flexible Systems Tailored to Your Needs**

Our window washing systems are hand-operated for the left – right movements and electrically operated for the up- and down movements, fully tailored to meet specific customer requirements. This flexibility allows vessel owners and operators to choose the system that best fits their operational needs.

### **Fast Deployment, Maximum Efficiency**

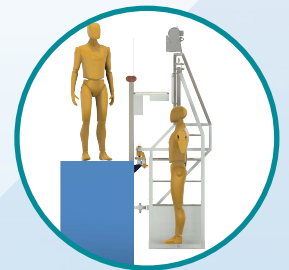

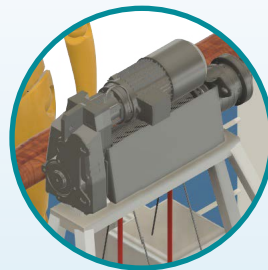

The system is designed for quick deployment while the vessel is at the quay for a short period. Thanks to a proven winch and basket system for window washers, setup is fast and efficient, allowing cleaning operations to be completed within tight timeframes.

### **Cost Savings & Certified Safety**

With a Lloyd’s approved concept, vessel owners benefit from reduced operational costs, increased flexibility, and safe, reliable operation. The system combines cost efficiency with certified safety, ensuring full compliance with the highest industry standards. The systems for level 3 and level 6 are defined as being Suspended Access Equipment (per EN 1808).

### **Reliable and Approved Performance**

Designed for consistent and dependable use, the system delivers proven performance in real operational conditions. Thanks to its robust design and high-quality materials, operators can rely on a solution that performs efficiently, even in the most demanding marine environments.

### **Built for Marine Quality**

At Ned Marine, quality comes first. We understand the challenges of marine environments and maintenance requirements, which is why we only use high-quality materials designed to perform under the most demanding conditions.

### **Experience You Can Trust**

Ned Marine is a leading manufacturer of aluminum gangways and window washing systems for cruise vessels. With our own production facility in the Netherlands, we deliver true 100% Dutch quality. We ship and service worldwide, supporting our clients wherever they operate.

### **Ready to Optimize Your Window Cleaning Process?**

Looking for a safe, efficient and cost-effective solution for your cruise vessel? Contact Ned Marine Services BV today and request more information or a tailored quotation.
